FUNCTIONAL

SUPERIOR **PERFORMANCE**

Prado ensures superior performance at all times with wheel articulation, which is the ability of the wheel to travel up or down relative to the wheel on the opposite side. Over uneven ground, the wheel articulation keeps as many tires on the ground as possible for a stable grip. This vehicle is a superior marvel that enhances driving experience with the Electric Power Steering (EPS) that ensures light steering force at low-speeds and straight-line stability at high-speeds; the Adaptive Variable Suspension System (AVS) that adjusts damping force according to road conditions from minor to large bumps; size-appropriate tires that enhance the grip on the road; and the power of a high-torque diesel engine combined with the newly developed TNGA 8-speed Automatic Transmission to enhance driving performance, fuel economy and quietness.
